Now, it is a sad fact that some physicans pretend to regard this complaint lightly, and assure patients that no injury will follow. This is faise, and the physician who makes such a statement does so because he knows absolutely nothing either of the disease or its treatment.

It is a most serious disease, a dangerous condition to be in, and its consequences to life and health are incalculable. Every sufferer knows that it is no trivial complaint which is slowly but surely sapping his very life, which he feels day by day is exhausling his strength, paralyzing his energies and rendering him weak and inefficient as a man, darkening all his futurith gloom and despair, and leaving him a mere wreck—a semblance, as it were, of the strength and vigor he formerly possessed.

The rioral of this is for sufferers to seek a care now while the disease is curable, and not wait until it reaches an incurable and hopeless stage.

The ilsease is a perfectly curable one but requires great skill and experience upon the part of the physician, and above all the exact medicines necessary to effect the cure. The specialist alone, who by study and investigation thoroughly understands his class of diseases, and who by long experience and continuous success has discovered the perfect treatment to cure, is the physician to whom sufferer should apply.

Dear sir: I am just in receipt of your documents, showing the "old soldiers" what a friend they have in:Cleveland, the man who in the time of his peril bravely said. "Here am I," and helped fight the battles of his country with a substitute! So far as I know, the real ex-soldiers of this neighborhood have no use for the services of such friends in the Presidency and Vice Presidency of the Republic as Cleveland and Stevenson—one a substitute hirer; the other a copperhead during the war for the Union. I suspect that your highly titled association is mostly made up of veterans who did service with commutation money and substitutes.

Yours respectfully, etc.
